## M.Sc. Architect & Interdisciplinary Designer

Drawing upon my extensive experience in the field of architecture spanning about 10 years, I have worked on diverse projects, including **residential, commercial, and public spaces**. Throughout my career, I have honed my skills in **drafting design drawings, creating 3D models, renderings, video animations and project management**. I had successfully on many roles in all phases of the project management from 1 to 7 from design development to implementation. I am dedicated to creating designs that are both aesthetically pleasing and practical, taking into account the needs and preferences of the clients, as well as the surrounding environment and my colleagues, and am constantly seeking innovative ways to improve my skills.
